Desiccant Dehumidifiers

For WDR Contractors

Realize Success With CDIMS

*Happy  
Holidays  
from CDIMS*

CDIMS provides dolly, caster, trailer or skid mounted systems from 600 CFM to 25,000 CFM for a wide variety of commercial and industrial applications.

Scott purchased a 2000 CFM trailer unit and has had it out on it's first job, with great results.

## An ARID-Dry CDH-R-126-2.0 desiccant dehumidifier can remove a lot of moisture,

according to Scott Mims of **Service Master by Mimsco**, in Anniston Alabama. Scott was called to clean up an appraiser's office in Pell City, Alabama, after an overhead water sprinkler gave way in November. Scott and his crew brought in their trailer mounted 2000 CFM unit produced by **ARID-Dry**, and got the job done in 3 days. The damaged office was 5,500 square feet with 10 foot ceilings and the **CDH-R-126-2.0** was able to reduce the affected air in the building from 78 to 9 grains in just a short period of time. The **ARID-Dry** unit runs at a lower noise level making it possible for associated air movers to run at a lower, quieter speed. This was important, according to Scott, because it allowed the office to stay open for business while the clean up and dry out took place. The dehumidifier is powered by a 90 gallon propane tank and is easily transported to any job. Scott said the **ARID-Dry** unit provided outstanding performance, above and beyond his expectations.

### TECH TIP:

#### Tom Says!

From all of us at ARID- Dry by CDIMS, we wish you Health, Happiness and Prosperity in the New Year!
