2,300	3,900	0.5	110

FEATURES:

Cools Quietly

- Operates at the lowest decibel level for portable air conditioners
- Ideal for temporary cooling in offices, meeting areas or classrooms
- Features backward-inclined plenum evaporator and condenser fans

Cools Effectively

- Performs at a wide range of temperatures and altitudes with a thermostatic-expansion valve—not found in ordinary units
- The valve automatically adjusts to the environment, functioning day after day, year after year—regardless of conditions
- Some models feature a set-and-forget seven-day, 24-hour programmable temperature control

Cools Efficiently

- Needs no special electrical requirements
- Three phase 5 ton model available
- Costs less to operate as it draws the least amount of amperage on a per-ton basis when compared to other portable units

Cools Quickly

- Designed for portability and convenience
- Sets up in minutes and cools quickly in a wide variety of environments
- Rugged design—rolls from shop floor to indoor office areas
- All units fit through doorways as small as 32-inches wide
